RODNEY KOHLER JOINS CALDWELL ENERGY

LOUISVILLE, KY FEBRUARY 6, 2013: Caldwell Energy Company (CEC), the premier supplier of specialized power augmentation and thermal energy storage equipment for the energy market, is pleased to announce Rodney W. Kohler has joined the Caldwell Energy Team as the Director of Business Development. Kohler has over 18 years in the gas turbine industry, from the engineering and design of fuel and lubrication systems to responsibilities as a field engineer for General Electric and most recently, as the Global Gas Turbine Product Manager for Danfoss High Pressure Pumps. Kohler will be responsible for new product developments and customer driven improvements for the power generation industry.

About Caldwell Energy

Caldwell Energy, a division of Caldwell Tanks, Inc., is headquartered in Louisville, KY, and has been providing premier Combustion Turbine Power Augmentation Systems since 1995. Caldwell Energy is the only provider of all turbine inlet cooling technologies (fog evaporative cooling, Wet Compression, Chilling and Thermal Energy Storage) and is ISO 9001:2008 certified.
