**FOR IMMEDIATE RELEASE  
January 27, 2017**

**Naperville, IL** – The Turbine Inlet Cooling Association (TICA) is pleased to announce the following TICA Officers and Directors elected at its annual meeting on December 12, 2016 in Orlando, FL for their terms starting 2017

Chairman,  
Rodney Kohler  
(Victory Turbine)

Vice Chairman,  
Steven Good  
(Danfoss Corp.)

President,  
Chris Mincey  
(Crom Corp.)

Vice President  
John Lau (Baltimore  
Aircoil)

Secretary,  
Guy Frankenfield  
(DN Tanks)

Treasurer,  
Patricia Graef  
(Munters Corp.)

Director,  
John Anreport  
(Cool Solutions)

Director,  
Chris Mieczkowski  
(Stellar Energy)

Director,  
Trey Sims  
(TAS Energy)

The officers were elected for a two-year term and the directors were elected for a three-year term.

TICA has been developing and disseminating information about gas turbine inlet cooling (TIC) since 2000. The information developed TICA is available on its website at <http://www.turbineinletcooling.org> and includes the following:

- Information, including webinars, about all TIC technologies: wetted-media, fogging, wet compression and chilled-water systems including electric and absorption chillers, without and with thermal energy storage
- TIC Technology Performance Calculator (<http://turbineinletcooling.org/coolingcalculator.html>)
- TIC Installations Database (<http://turbineinletcooling.org/database.html>)
- Library of TIC Bibliography (<http://turbineinletcooling.org/resources/index.html>)
- Access to experts for all TIC technologies ([http://turbineinletcooling.org/buyer/profile\\_main.html](http://turbineinletcooling.org/buyer/profile_main.html))
- Online TIC Users' Forum (<http://turbineinletcooling.org/members/forum/>)

The list of its 58 members, including 32 gas turbine users is available at <http://turbineinletcooling.org/about/ticamembers.html>.

Please visit the TICA website for the various membership benefits for suppliers and gas turbine usersd. The TICA membership form is also available online at [http://www.turbineinletcooling.org/about/onlinemember\\_form.php5](http://www.turbineinletcooling.org/about/onlinemember_form.php5).

###

Turbine Inlet Cooling Association (TICA) is a non-profit trade association that promotes the development and exchange of knowledge related to gas turbine inlet cooling (TIC) for enhancing power generation worldwide. TIC provides a cost-effective, energy-efficient, and environmentally beneficial means to enhance power generation capacity and efficiency during hot weather.
